FORM HS-01 · REV. 4   POST-STASIS REFRESHER · MODULE 1 OF 9   ISSUED AT THE REVIVAL BAY EXIT

DUNEWRIGHT COLONY WORKS
Settlement Site 4 · Construction Division · Health & Safety

WELCOME BACK.

YOU'VE BEEN ASLEEP A LONG TIME. LEARN THE SITE BEFORE THE SITE TEACHES YOU.

REVIVAL CLEARANCE

YOU ARE NOT CLEARED TO WORK UNTIL MED BAY SAYS SO.

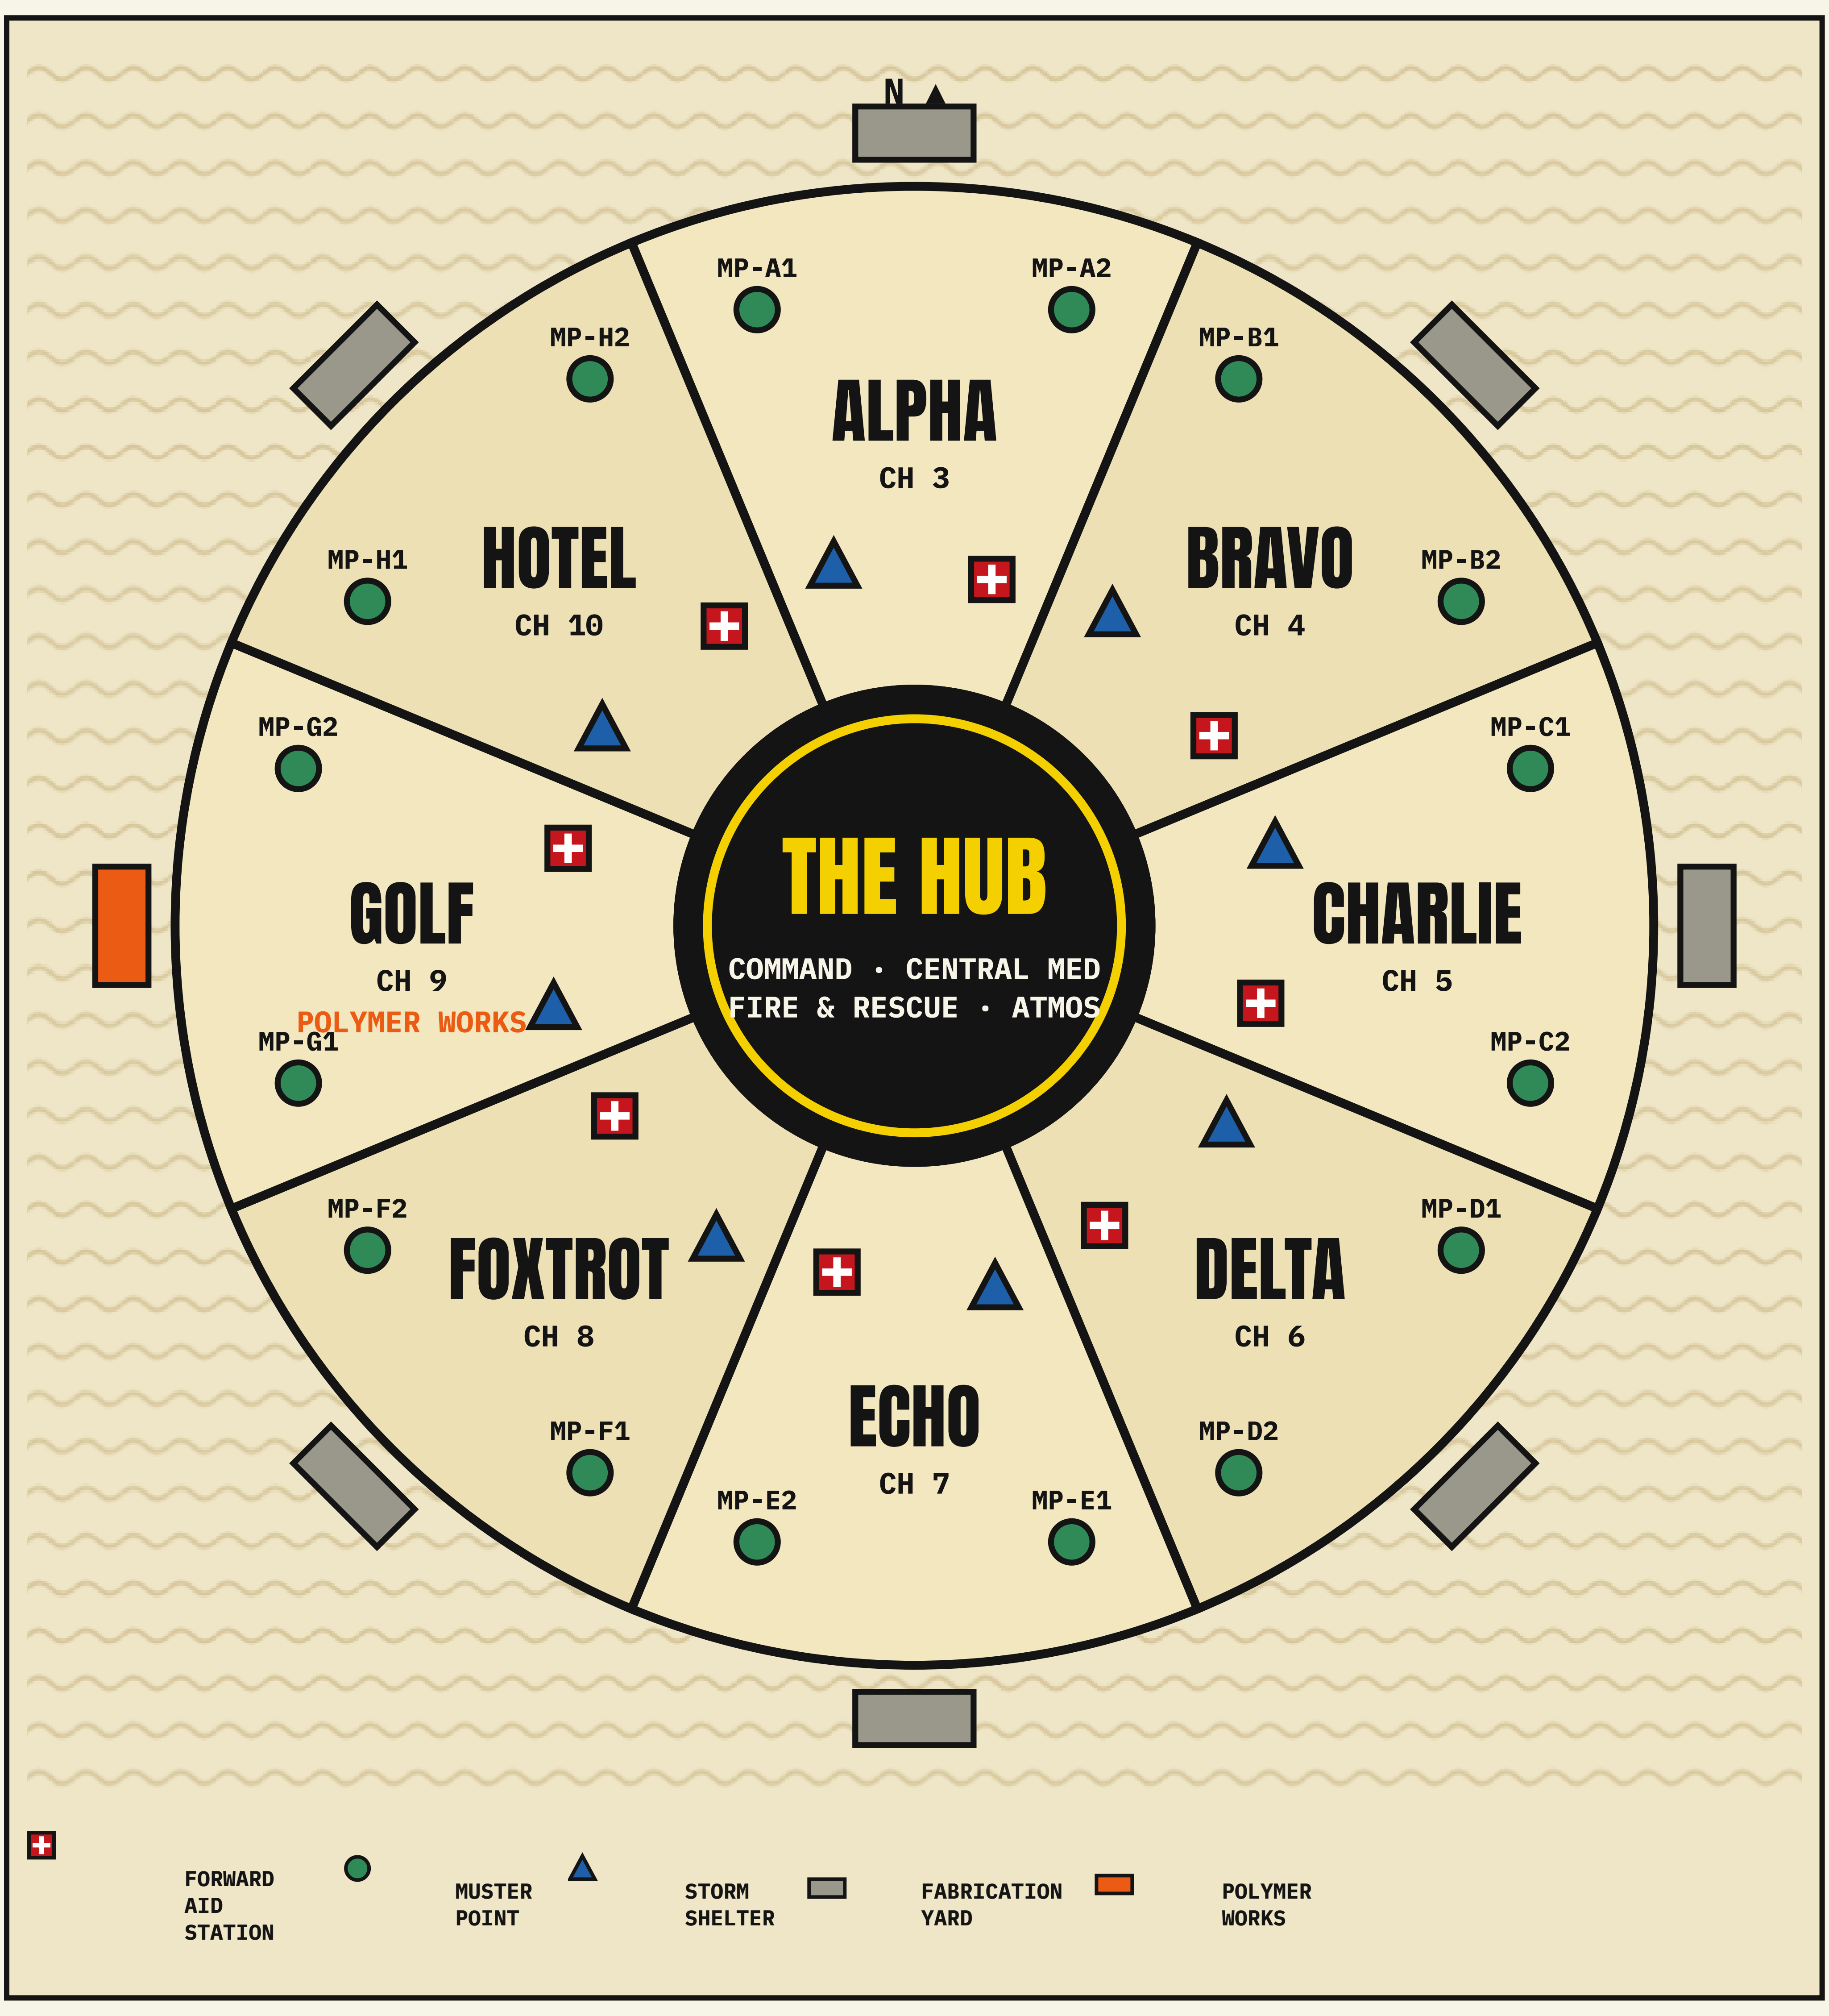
Stasis leaves you dehydrated, weak and slow to react for the first days. Your balance, vision and grip strength come back gradually. You may feel fine and still fail the checks.

4	0	5
CHECKS TO PASS	VEHICLES OR MACHINES UNTIL CLEARED	DAYS ON THE RAMP STICKER

- **Weigh-in and hydration check** at Med Bay. Your baseline weight goes on your badge record for the heat program.
- **Balance and vision check.** Fail either and you stay on ground-level light duty. No ladders, no height work.
- **Grip and reaction check.** Required before you touch powered tools, cranes or vehicles.
- **RAMP sticker** on your helmet for Days 1–5. Everyone who sees it knows to watch you.

SITE MAP

SETTLEMENT SITE 4 · NORTH AT TOP
NOT TO SCALE



Every grid block has a sealed, cooled storm shelter. Shelters shown are the large ones. Find the one nearest your work face on your first shift.

SAY WHERE YOU ARE

Every radio call, report and request uses the same location format. Medics, rescue and cranes find you by it.

CHARLIE-14, DECK 3

SECTOR	GRID	DECK
Alpha through Hotel. Named by the NATO letter.	1–40 inside each sector. Painted on every grid post.	Level of the structure. Deck 0 is the ground.

CHANNEL 1 RULE

Every radio on site monitors Ch 1, Site Emergency, at all times. Work on your crew channel, but keep Ch 1 on scan.

- Ch 1 is for emergencies only. No chatter, no checks.
- Emergency call: **"Emergency, emergency, emergency"**, then type, location, number hurt.
- **"ALL STOP, ALL STOP"** on any channel stops every crane, machine and torch in earshot until cleared.
- Full channel plan: see the radio reference (REF-RAD).

SIRENS

HEARD SITE-WIDE · KNOW THEM BEFORE YOUR FIRST SHIFT

▬ ▬ ▬ ▬ **TAKE SHELTER** Continuous long tone	Sandstorm or atmospheric hazard. Make your work safe in seconds, then go to the nearest sealed shelter. Don't wait to see it.
▲ ▼ ▲ ▼ **EVACUATE** Alternating high-low	Leave the structure and go to your **muster point**. Check in with your crew lead. Never go back for tools.
● ● ● **ALL STOP** 3 short blasts	Stop all motion: cranes, equipment, hot work. Hold position. Listen to Ch 1.
▬ **ALL CLEAR** 1 long after any of the above	Return to work only when your crew lead confirms it.

HARD HATS BY STATION

COLOR TELLS YOU WHO TO ASK

COLOR	STATION	GO TO THEM FOR
White	Managers, superintendents, engineers, foremen	Work orders, plans, permits
Yellow	General crew, laborers, equipment operators	Your crew and the work face
Orange	Riggers, signal persons, lift crew	Anything under or near a load
Blue	Electricians and power techs	Power, cables, energized gear
Brown	Welders, cutters, hot-work crews	Hot-work zones and permits
Green	Safety & Health officers	Hazards, near misses, PPE
Red	Fire & Rescue, fire watch, emergency response	Emergencies. Follow their orders.
Grey	Survey, QA/QC, inspectors	Layout, measurements, inspections
RAMP sticker	Any color: newly revived, Days 1–5	Watch them. Check on them first.

FIRST SHIFT

IN THIS ORDER · YOUR CREW LEAD SIGNS EACH STEP

1. **Pass revival clearance** at Med Bay and collect your badge, radio and RAMP sticker.
2. **Draw PPE** from the Quartermaster: helmet, boots, gloves, eye and hearing protection, cooling vest. Get fit-tested for your respirator (Module 2).
3. **Report to your crew lead** at your sector muster point. Get your crew channel and buddy.
4. **Walk the route** with your buddy: nearest Forward Aid Station, storm shelter, cooling station and muster point.
5. **Radio check** on your crew channel. Confirm Ch 1 is on scan.
6. **Light duty only** for your ramp share of the shift (20% on Day 1). Your crew lead logs it.
7. **Finish the refresher modules** before you take on any task they cover. Modules are posted at every muster point and on the refresher index.

CHAIN OF COMMAND

Crew of 10–12 → Crew Lead → Foreman → General Foreman → Sector Superintendent → Deputy Director → Colony Construction Director.

Go to your crew lead first. Safety concerns can go straight to any green helmet. Full chart: REF-ORG org chart.

BADGE RULES

- Wear it on your chest, photo out, every shift.
- Your badge lists every machine, permit and module you're cleared for. No badge entry, no task.
- Never lend it. Never badge someone else through a gate.
- Lost badge: report to Security on Ch 2 the same shift.

REPORT NEAR MISSES

A near miss is an accident that didn't happen this time. Report every one to your crew lead or a green helmet before the end of shift.

No blame for reporting. The next crew depends on what you tell us.

STOP-WORK AUTHORITY

Every worker on this site can stop work when something looks unsafe. No penalty, no questions. Stop it, make it safe, tell your crew lead. Refresher modules: index.

WORKER ACKNOWLEDGEMENT

I have passed revival clearance, I know my sector, muster point, nearest shelter and aid station, I keep Ch 1 on scan, and I know the siren signals.
