FORM REF-ORG · REV. 5 · POST-STASIS REFRESHER · REFERENCE SHEET · POST AT EVERY SECTOR OFFICE

DUNEWRIGHT COLONY WORKS
Settlement Site 4 · Construction Division · Safety & Health

WHO ANSWERS TO WHO.

15,210 WORKERS, ONE CHAIN OF COMMAND. LEARN THE STATIONS, NOT THE NAMES. PEOPLE ROTATE. STATIONS DON'T.

YOUR CHAIN OF COMMAND

FIELD CREWS · BOTTOM TO TOP

YOU	CREW LEAD	FOREMAN	GENERAL FOREMAN	SECTOR SUPER	DEPUTY, OPS	DIRECTOR
Crew member · 1 of ~12 · yellow	Runs one crew · yellow + LEAD band	~4 crews · white	One trade, one sector · white	All work in one sector · white	All 8 sectors + site-wide trades	The whole build · "Hub Actual"

Take problems one step up, not five. Safety is the exception: anyone can stop unsafe work, any Safety & Health officer (green hat) can stop your work, and you can go straight to one about any hazard.

SITE ORGANIZATION

HEADCOUNT AT FULL REVIVAL

COLONY CONSTRUCTION DIRECTOR

The Hub · call sign "Hub Actual" · command desk "Hub Command" on Ch 2 · white hat

DIRECTOR'S STAFF & SECURITY

Planning, scheduling, training records · staff 60 (white) · Security 150 (black), "Security Desk", monitors Ch 2

DEPUTY, OPERATIONS

"Hub Ops" · everything that gets built

8 Sector Superintendents
Alpha–Hotel · "[Sector] Super" · 880 each · 7,040

Crane & Lift
Lift Directors (white), operators (yellow), riggers and qualified signal persons (orange) · Ch 11 · 900

Heavy Equipment Pool
Haulers, loaders, dozers, structure printers · Ch 12 · 1,400

Fabrication Yards
Machinists (yellow), welders and cutters (brown) · sector edges · 1,600

Polymer Works
Polymer and composite techs · Golf · 700

Electrical & Power
Qualified electrical workers · grid, power cells, site lighting · 1,100

DEPUTY, SAFETY & HEALTH

"Hub Safety" · stop-work authority site-wide

Safety & Health Officers
~1 per 75 workers (DCW standard) · every sector · "Safety [Sector] [n]" · 200

Fire & Rescue
Hub HQ + sector teams · fire, rescue, hazmat · "Rescue [n]" · 240

Atmospheric Office
Weather, WBGT, wind, warnings · "Atmos" · Ch 16 · 40

Industrial Hygiene
Samples air, silica, noise and chemicals · runs the respiratory and hearing programs · "Hygiene [n]" · 20

DEPUTY, ENGINEERING

"Hub Engineering" · what gets built, and is it right

Design & Structures
Plans, lift plans (approved by the Lift Director), temporary works · "Design [n]" · 260

Survey
Layout, grids, buried-service locates, settlement monitoring · 140

QA/QC & Inspection
Quality assurance and quality control · welds, bolts, pours, polymer cures · 120

DEPUTY, LOGISTICS

"Hub Logistics" · everything you need, delivered

Quartermaster
Kit issue, PPE exchange, locks, water, rations, ice · Ch 15 · 600

Materials & Laydown
Steel, panels, feedstock · 220

Transport
Crew shuttles, site roads · 80

DEPUTY, MEDICAL

"Hub Medical" · keeps you alive and working

Central Med
The Hub · serious cases, surgery, ICU, counselors · Ch 14 · 140

Forward Aid Stations
One per sector · all injuries and illness · "[Sector] Aid" · medics · 120

Stasis Revival Unit
Runs Revival Med Bay: clearance, weigh-in, badge, radio, RAMP band, re-clearance · counselors · "Revival [n]" · 80

HARD HATS

BY STATION · FULL KEY IN MODULE 1 (HS-01)

White: supers, assistant supers, general foremen, foremen, engineers, managers, Lift Directors	**Yellow:** crew members, laborers, equipment and crane operators, machinists, polymer techs, all other trades	**Yellow + white LEAD band:** crew leads	**Orange:** riggers, qualified signal persons, lift crew
Blue: electricians and power techs (Electrical & Power)	**Brown:** welders, cutters, hot-work crews	**Green:** Safety & Health officers, Industrial Hygiene, Atmospheric Office field staff	**Red:** Fire & Rescue
Red, white cross: medics and Stasis Revival Unit staff	**Grey:** survey, QA/QC, inspectors	**Black:** Security	**Purple:** visitors and non-construction staff, always escorted
RAMP band on any hat: heat-ramp Days 1–5	**Red FIRE WATCH vest** over normal PPE: a trained crew member on fire watch. No rescue or command authority. Red hats have it.		

INSIDE ONE SECTOR

SAME LAYOUT IN ALPHA THROUGH HOTEL

1	2	6	18	70	~780
SECTOR SUPERINTENDENT	ASSISTANT SUPERS (DAY / NIGHT)	GENERAL FOREMEN, ONE PER TRADE	FOREMEN	CREW LEADS	CREW MEMBERS

TRADES IN EVERY SECTOR

- **Steel & ironwork:** erection, bolting, decking
- **Structural print & concrete:** printed walls, pours, finishing
- **Framing & panels:** hab shells, cladding, seals
- **Site services:** trenching, utilities, pipe
- **Finishing & fit-out:** interiors, hatches, fixtures
- **General labor:** laydown, cleanup, water runs, cooling stations

Cranes, heavy equipment, fabrication, polymers and power are site-wide departments. They're assigned into sectors job by job, take direction from the sector on site, and muster with the sector they're working in that day.

MUSTER AND COMMAND

- **Muster** at the assigned muster point of the sector you're working in today (two per sector, MP-A1 to MP-H2).
- A **muster warden** (a named crew lead at each MP) collects crew headcounts and reports once to the Super on the sector channel. Crew leads also tell their own department where their people are.
- **Shelters:** the senior person reports the headcount on that shelter's sector channel. Missing persons go on Ch 1.
- **At a scene:** the first person there is incident commander until relieved, and hands over command out loud. Fire & Rescue takes command of fire, rescue and hazmat scenes when it arrives. The Super runs muster and headcount.

WHO TO GO TO

START WITH YOUR CREW LEAD UNLESS IT CAN'T WAIT

PROBLEM	GO TO
Hazard, unsafe order	Your crew lead or any green hat. Anyone can stop unsafe work.
Someone needs a medic now	**Ch 1** for anyone who is confused, has collapsed, isn't breathing normally, is bleeding heavily, has fallen, has been shocked or badly burned, or shows heat-stroke signs.
Other injury or illness	Your sector's Forward Aid Station ("[Sector] Aid"), with a buddy, never alone. Tell your crew lead either way.
Incident, near miss, damage, unsafe condition	Your crew lead before the end of the shift (immediately if serious), on form **HS-IR** with your Colonist ID. No retaliation.
Too tired to work safely	Your crew lead or foreman, before you start. No penalty. See Supplement D (HS-SD).
Struggling after stasis: low mood, poor sleep, grief	SRU counselors at Revival Med Bay (walk in, any shift), or your FAS medic, who can refer you to Central Med counselors. No penalty for asking.
Ramp day, revival clearance	Stasis Revival Unit at Revival Med Bay, directly or through your crew lead. Feeling unwell? Go to the FAS any time.
PPE, water, ice, tools, lock	Quartermaster, Ch 15
Respirator, fit test, noise or dust reading	Industrial Hygiene ("Hygiene [n]"), through your crew lead or a green hat
Weather, WBGT, wind	Atmos on Ch 16. Your crew lead posts the readings at muster and hourly.
Permit question	The foreman responsible for the work area (white hat). See Permits at a glance (REF-PTW).
Crane or lift question	Your sector's Lift Director ("Lift Director [Sector]"), through your foreman. Ch 11 is for lift coordination only.
Plan looks wrong	Your foreman, then Engineering (white or grey hat)
Lost badge	Tell your crew lead the same shift. The crew lead reports it to the Security Desk.
Visitor without an escort	Your crew lead, who tells the Security Desk

ROLES YOU'LL HEAR

ONE TERM PER ROLE · FULL LIST IN REF-GL

ROLE	WHO IT IS	HAT
Lift Director	Crane & Lift supervisor who approves lift plans prepared by Design & Structures and directs critical lifts. Call sign "Lift Director [Sector]". Never "lift supervisor".	White
Qualified signal person, qualified rigger	Badge endorsements. Only a qualified signal person signals a crane (anyone can signal STOP).	Orange
Lift lead	A qualified rigger named in the lift briefing. Directs routine lifts.	Orange
Spotter	A trained worker guiding equipment movement, in the operator's view.	Trade color
Competent person	A trained worker named by the foreman for excavation, scaffolds or fall protection. Spots hazards and has authority to stop work. Badge endorsement.	Trade color
Entry supervisor	Foreman or general foreman with the HS-SA endorsement. Signs the confined-space permit (PTW-CS).	White
Attendant, entrant	Confined-space roles from Supplement A (HS-SA). Badge endorsements.	Trade color
Authorized employee, group-lockout lead	Trained to lock out. The group-lockout lead is the authorized employee named in charge of a group lockout.	Trade color
Qualified electrical worker	Electrical & Power. The only workers who test for voltage on electrical systems or work on power-cell terminals.	Blue
Fire watch	A trained crew member with the fire-watch endorsement, in a red FIRE WATCH vest. No rescue or command authority.	Trade color + red vest
Muster warden	The named crew lead at each muster point.	Yellow + LEAD band
First aider	CPR and Stop the Bleed trained. At least one in every crew.	Trade color
Buddy	Your assigned partner. Buddy pairs always.	Any

RESCUE AND FIRST AID CAPACITY

Fire & Rescue is 240 people across every shift: Hub HQ plus a team in each sector. They can't stand at every job, so rescue is planned before work starts.

- **Standby:** when a permit names a Fire & Rescue standby (for example a Supplement A (HS-SA) confined-space entry), the team is at the job and briefed before work starts. No standby on site, no start.
- **On call:** everywhere else, the sector team responds from its base. Targets (site rule): Fire & Rescue on scene within 10 minutes; confined-space on-call rescue at the hatch and starting rescue within 10 minutes. Your crew starts the rescue it's trained for: the deck's fall-rescue kit (HS-04), retrieval systems at entries (HS-SA), first aid.
- **Every crew** has a first aider (CPR and Stop the Bleed), a trauma kit with two tourniquets and a first aid kit. An AED is never more than a 3-minute round trip away.
- **Medics:** 120 Forward Aid Station medics across 8 sectors and all shifts. Target (site rule): a FAS medic on scene within 4 minutes anywhere in the sector. Central Med takes serious cases.

HEADCOUNT

FULL REVIVAL, ALL SHIFTS

STATION	REPORTS TO	WORKERS
8 sectors (Alpha–Hotel)	Deputy, Operations	7,040
Fabrication Yards	Deputy, Operations	1,600
Heavy Equipment Pool	Deputy, Operations	1,400
Electrical & Power	Deputy, Operations	1,100
Crane & Lift	Deputy, Operations	900
Logistics (Quartermaster, Materials, Transport)	Deputy, Logistics	900
Polymer Works	Deputy, Operations	700
Engineering (Design, Survey, QA/QC)	Deputy, Engineering	520
Safety & Health officers, Fire & Rescue, Atmospheric Office, Industrial Hygiene	Deputy, Safety & Health	500
Central Med, Forward Aid Stations, Stasis Revival Unit	Deputy, Medical	340
Director's staff and Security	Director	210
Total		**15,210**

Call signs and channels: radio reference (REF-RAD). Roles, glossary and badge endorsements: REF-GL. Hard-hat key with who to go to: Module 1 (HS-01).

Adapted from Old Earth standards: construction field supervision ladder (crew lead, foreman, general foreman, superintendent), NIMS/ICS incident command, ASME B30.5 (lift director), OSHA 1926.20 and 1926.32(f) (competent person), OSHA 1910.146(k) (rescue services), OSHA 1926.50 (first aid), ANSI/ISEA Z89.1 (head protection). Safety staffing of about 1 per 75 workers is a DCW standard; no Old Earth ratio exists.
