TALK SHORT. TALK CLEAR.

OVER 15,000 PEOPLE SHARE THESE CHANNELS. A SLOPPY CALL CAN BURY THE ONE THAT SAVES A LIFE.

CHANNEL PLAN

EVERY RADIO SCANS CH 1 + CH 16 + YOUR SECTOR CHANNEL

1 **SITE EMERGENCY** Emergencies only. Always on scan. Priority channel.	**2** **SITE COMMAND** Hub Command, deputies, supers. Security monitors.	**3** **ALPHA SECTOR** Sector ops	**4** **BRAVO SECTOR** Sector ops
5 **CHARLIE SECTOR** Sector ops	**6** **DELTA SECTOR** Sector ops	**7** **ECHO SECTOR** Sector ops	**8** **FOXTROT SECTOR** Sector ops
9 **GOLF SECTOR** Sector ops · Polymer Works	**10** **HOTEL SECTOR** Sector ops	**11** **CRANE & LIFT** Coordination only. Loads move on the lift talkgroup.	**12** **HEAVY EQUIPMENT** Haulers, dozers, loaders, printers
13 **HOT WORK & FIRE WATCH** Welders, fire watch. Hot-work permits opened and closed. Fire reports.	**14** **MEDICAL** Medics, aid stations, Central Med. Workers only when told.	**15** **LOGISTICS** Quartermaster, deliveries, water	**16** **ATMOSPHERIC** Atmos: weather, WBGT, wind, warnings. Always on scan.

SCAN RULE

- **Every radio scans Ch 1 + Ch 16 + your sector channel.** Crane, equipment and hot-work crews add their trade channel (11, 12 or 13).
- Ch 1 is set as the priority channel. It cuts in over everything else (site rule).
- Hub Command rebroadcasts **every siren** and **every sandstorm, flood and lightning warning** on Ch 1.
- Check your scan list at every radio check.

TALKGROUPS

- **Foreman talkgroup**, e.g. "C-F14" (Charlie, Foreman 14). Crew check-ins and routine crew traffic. "Crew channel" means your foreman talkgroup.
- **Lift talkgroup**, e.g. "Lift C-07". Every lift gets its own, named on the lift plan. Signals that move loads go only there. Ch 11 is coordination only, never for moving loads.
- **During a lift** the operator's radio is hands-free, tested before the lift, and does not scan. The lift plan names someone else to scan Ch 1 + Ch 16 and relay warnings on the lift talkgroup. Sirens and strobes still reach the cab.
- **Entry talkgroup:** a confined-space entry uses the talkgroup named on its PTW-CS (Supplement A (HS-SA)).

EMERGENCY CALL

Channel 1. Plain language only. No codes, no slang.

TYPE. WHERE. HOW MANY. HAZARDS. WHO.

Types: Heat casualty · Man down · Fall · Fire · Gas · Chemical · Structural · Struck-by · Caught-in · Electrical · Confined space · Flood · Sandstorm. A short qualifier after the type is fine ("Fall, worker suspended"). A burn with nothing still burning is "Man down".

```
"Emergency, emergency, emergency.
[type] Struck-by.
[location] Delta-22, Deck 0, haul road east.
[hurt] One hurt, conscious, leg bleeding.
[hazards] Hauler stopped, engine off.
[you] This is Delta Crew 22-1."
```

- **The caller stays on Ch 1** until Hub Command or the medic releases them.
- **Everyone else stays off Ch 1** (and off Ch 14 during a mass casualty).
- **Other channels keep working.** Land the load, park the machine, keep talking to your entrant.
- Workers use Ch 14 only when told.

ALL STOP

```
"ALL STOP, ALL STOP."
```

- Anyone can call it, on any channel. Three short siren blasts mean the same.
- **Stop all motion, hot work and machine operation. Hold position.**
- A suspended load is landed only on the signal person's direction.
- Cleared on the same channel by whoever called it, or by command.

LOST COMMS

During a lift: the operator stops all motion and holds the load. Resume only when the radio is back and tested, or when the signal person is in the operator's full, continuous view and the operator, signal person and whoever directs the lift (the Lift Director, or the lift lead on a routine lift) agree to switch to hand signals (REF-HS). Blind lifts stay stopped.

Anywhere else:

1. Try another channel, then try again from higher ground.
2. Still nothing? Stop work that needs a radio. No blind equipment moves.
3. Send a buddy pair to your foreman. Nobody goes alone at Caution heat or higher.
4. Missed your check-in? If the call-back gets no answer within 5 minutes, your foreman sends someone in person. Stay where your foreman expects you.
5. Siren while you're out of contact? Take cover or evacuate on the siren. Leave cover only on the voice all clear, passed on by your crew lead or a runner.

SIREN SIGNALS

SIRENS BEAT RADIOS FOR TAKING COVER.
LEAVING COVER NEEDS THE VOICE ALL CLEAR.

SIGNAL	SOUND	DO
Take shelter	Steady tone for 3 minutes, repeated every 5 minutes while the danger lasts. Red strobes.	Make safe. Nearest sealed shelter now.
Evacuate to muster	Alternating high-low tone for 3 minutes, repeated. Amber strobes.	Make safe and walk to the muster point of the sector you're working in. Report to your crew lead.
All stop	3 short blasts, 1 second each.	Stop all motion, hot work and machines. Hold position. Listen to Ch 1.
All clear	One 15-second tone, then Hub Command by voice on Ch 1: "All clear, all clear, [area]."	**Never leave a shelter or restart work on a tone alone.** Wait for the Ch 1 voice all clear or your crew lead.

Every siren is rebroadcast on Ch 1. Strobes in sealed cabs, high-noise areas and shelters. **Weekly siren test:** every 7th day at 1200, announced on Ch 1 before and after ("This is a test"). **Machine horns** are machine-local, never site signals: 1 = stopping, 2 = moving forward, 3 = backing up.

STAGED WARNINGS

ATMOS ON CH 16 · REBROADCAST ON CH 1

WARNING	MEANS	DO
Sandstorm watch	A storm is possible within 2 hours.	Secure loose material. Plan how loads come down. Stage crews near shelter.
Sandstorm warning	Arrival expected within 30 minutes.	Land all loads. Booms down (tower cranes to free-slew per maker). Climbers and MEWPs down. Move to shelter. The take-shelter siren sounds no later than 15 minutes before arrival.
Flood warning	Called by grid on Ch 1 and Ch 16.	Leave wadis, trenches and low cuts at once. There is no flood siren, so keep your scan on.
Lightning alert	Strikes within 10 miles.	Booms down, off steel, out of MEWPs. Into sealed shelters or closed vehicles, never under steel. Resume 30 minutes after the last strike within 10 miles.

What to do in each emergency: HS-09.

CHECK-INS

- **Buddies** watch each other continuously.
- The **crew lead sees every crew member** at least every 30 minutes.
- The **crew lead checks in with the foreman every 30 minutes** on the foreman talkgroup.

```
"Charlie Foreman 14, Charlie Crew 14-3, check-in.
Twelve on deck, all good. Out."
```

- **Missed check-in:** immediate call-back. No answer within 5 minutes: someone goes in person.
- **Lone work** (only below Caution, never at height, in confined spaces or near wadis or trenches): 15-minute check-ins and a logged location.
- **Confined space:** the attendant checks in with each entrant at least every 5 minutes, by the method named on the PTW-CS.

HEADCOUNTS

Muster: crew leads report in person to the **muster warden** (a named crew lead at each muster point). The warden reports once to the Super on the sector channel.

```
"Charlie Super, Muster MP-C1.
Fourteen crews. One hundred sixty-two
assigned, one hundred sixty present. Two
missing, details follow. Over."
```

Shelter: the senior person reports as "Shelter [Sector]-[grid]" on **that shelter's** sector channel. Missing persons go on Ch 1.

Crew leads also tell their own department where their people are.

CALL SIGNS BY STATION

CALL SIGNS BELONG TO THE STATION.
WHOEVER HOLDS THE STATION USES IT.

STATION	CALL SIGN	EXAMPLE
Colony Construction Director	`Hub Actual`	"Actual" means the Director in person, as opposed to the command desk or staff.
Site command desk	`Hub Command`	Hub Command
Deputy directors	`Hub + division`	Hub Ops · Hub Safety · Hub Engineering · Hub Logistics · Hub Medical
Sector superintendent	`[Sector] Super`	Charlie Super
Assistant superintendent	`[Sector] Assist Day / Night`	Charlie Assist Night
General foreman	`[Sector] GF [Trade]`	Charlie GF Steel
Foreman	`[Sector] Foreman [n], a fixed number`	Charlie Foreman 14
Crew (used by the crew lead)	`[Sector] Crew [foreman n]-[crew n], fixed when the crew is formed`	Charlie Crew 14-3 = Charlie, foreman 14, crew 3
Crew member	`Crew call sign + your number`	Charlie Crew 14-3 Seven
Safety & Health officer	`Safety [Sector] [n]`	Safety Charlie 3
Lift Director	`Lift Director [Sector]`	Lift Director Charlie
Crane operator	`Crane [Sector] [n]`	Crane Charlie 7
Qualified signal person	`Signal [Sector] [n]`	Signal Charlie 7
Heavy equipment & printers	`[Machine] [Sector] [n]`	Hauler Delta 22 · Printer Golf 2
Fire watch	`Fire Watch [Sector] [n]`	Fire Watch Bravo 5
Medic	`Medic [n]`	Medic 12
Forward Aid Station (FAS)	`[Sector] Aid`	Charlie Aid
Central Med (Hub)	`Central Med`	Central Med
Fire & Rescue	`Rescue [n]`	Rescue 3
Atmospheric Office	`Atmos`	Atmos
Industrial Hygiene	`Hygiene [n]`	Hygiene 2
Design & Structures	`Design [n]`	Design 5
Stasis Revival Unit	`Revival [n]`	Revival 4
Quartermaster	`Quartermaster`	Quartermaster
Security (monitors Ch 2)	`Security Desk · Security [n]`	Security Desk · Security 9
Shelter	`Shelter [Sector]-[grid]`	Shelter Charlie-14
Muster point	`Muster [MP]`	Muster MP-C1

Always say the label word (Crew, Foreman, Hauler, Shelter, Muster) so a call sign never sounds like a location. Lost badge? Tell your crew lead the same shift. The crew lead reports it to the Security Desk. Roles and stations: REF-ORG · REF-GL.

HOW TO MAKE A CALL

1. Listen first. Don't talk over someone.
2. Press, wait one second, then speak. The first word gets clipped otherwise.
3. **Who you want, then who you are.** Say it once.
4. Say the message. Keep it under 20 seconds.
5. End with "over" if you need a reply, "out" if you're done.

```
On talkgroup C-F14:
"Charlie Foreman 14, this is Charlie Crew 14-3, over."
"Charlie Crew 14-3, Charlie Foreman 14, go ahead."
"Charlie-14, Tower B, Deck 3 steel is set. Requesting inspection, over."
"Copy. Safety Charlie 3 inbound, one-five minutes. Out."
```

PROWORDS

`Over`	I'm done talking. Your turn.
`Out`	Conversation over. No reply needed.
`Copy`	I heard and understood you.
`Wilco`	I understand and will do it.
`Say again`	Repeat your last message.
`Stand by`	Wait. I'll come back to you.
`Affirmative`	Yes.
`Negative`	No.
`Go ahead`	I'm ready for your message.
`Break, break`	Cuts in on a work channel for urgent safety traffic: "Break, break, stop the swing, man under the load." Life at risk: use Ch 1 "Emergency". To stop all motion: "ALL STOP".
`Radio check`	How do you hear me? Answer "loud and clear" or "weak".

Never say "over and out". "Over" asks for a reply and "out" ends the call.

PHONETIC ALPHABET

SPELL GRIDS, PART NUMBERS AND NAMES

A ALFA	**B** BRAVO	**C** CHARLIE	**D** DELTA	**E** ECHO	**F** FOXTROT
G GOLF	**H** HOTEL	**I** INDIA	**J** JULIETT	**K** KILO	**L** LIMA
M MIKE	**N** NOVEMBER	**O** OSCAR	**P** PAPA	**Q** QUEBEC	**R** ROMEO
S SIERRA	**T** TANGO	**U** UNIFORM	**V** VICTOR	**W** WHISKEY	**X** X-RAY
Y YANKEE	**Z** ZULU	**0** ZERO	**1** ONE	**2** TWO	**3** THREE
4 FOUR	**5** FIVE	**6** SIX	**7** SEVEN	**8** EIGHT	**9** NINER

NUMBERS

- **Digit by digit** for grids, IDs, channels and call signs: 14 is "one-four". Charlie Crew 14-3 is "Charlie Crew one-four dash three".
- **9 is "niner"**, so it isn't heard as "five" or "nein".
- **Headcounts** may be spoken as words: "twelve on deck".
- No other alternate pronunciations.

LOCATION FORMAT

Sector-grid, structure, deck, landmark. Grid numbers are painted on every grid post.

- "Charlie-14, Tower B, Deck 3, east stair."
- Open ground: "Delta-22, Deck 0, haul road east."
- Trenches: "Echo-7, trench, north end."
- Below grade: "Deck minus 1".

RADIO DISCIPLINE

Think, then key. No chatter, no music, no jokes on work channels. Never sit on the transmit key. Use call signs. Never use names on air. Keep Ch 1 clear unless someone's life or the site is in danger. Check your radio and scan list at the start of every shift.

Adapted from Old Earth standards: ICAO Annex 10 / NATO phonetic alphabet and number pronunciation, US Army and public-safety radio procedure, FEMA NIMS plain-language communications, OSHA 29 CFR 1926.1419–1420 (crane signals and radio), 1926.35 and 1926.159 (emergency action plans and alarms), NOAA/NWS lightning safety (30-minute rule).
